Studying Companion - CMPS271

Team info:
- Adam Harb (aih17@mail.aub.edu)
- Mohamad Zaatari (moa27@mail.aub.edu)
- Joseph Hage (jgh25@mail.aub.edu)

How the team leader was chosen:
Adam was chosen as the team captain by unanimous decision since he's led several projects before and has the most experience with web development.

Meeting time each week:
- Wednesday @ 7:00
- Mondays & Fridays upon necessity

Technicalities:
- Front-end: Single Page Website using ReactJS
- Back-end: NodeJS
- Database: MongoDB, Mongoose
- Version Control System: Git, Github
- Team management software: Trello

Product vision:
Students that need an app which assists with studying (especially those with dyslexia, adhd & other learning disabilities). The studying companion is an educational software

that aids students in studying. Unlike other websites such as Quizzlet, our product aims to retain students' attention as well as helping them track their progress, time management, and organize their notes.

- *What* is the product to be developed?
  The Study Companion is an educational tool that assists students in their learning process.
- *Who* are the target customers and users?
  Students that need an app which assists with studying (especially those with dyslexia, adhd & other learning disabilities)
- *Why* should customers buy this product?
  Unlike other websites such as Quizzlet, our product aims to retain students' attention as well as helping them track their progress, time management, and organize their notes.
